# Overview

BEC Systems is proud to introduce SKOOT. Framed on 4 sides using lightly proportioned bespoke aluminium extrusions, SKOOT's clean, crisp, angular design has been consciously conceived to reflect the latest trends in office furniture.

The use of intelligently designed aluminium extrusions ensures that SKOOT screens will integrate with the TRIO RANGE. The SKOOT product family includes plain fabric screens with two toprail options, and part or fully glazed configurations which allow the specification of a drywipe panel section if required.

Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that SKOOT screens can be confidently specified for use within the full hierarchy of office interiors.

T1 and T2 screens in the SKOOT range are framed with robust aluminium extruded profiles on 4 sides, powder coated to match the desk frames and cleverly designed to include multiple features for accessorising. T1 screens have an integral hanging facility within the top rail, and the addition of the triple toolbar on T2 enables many accessories to be mounted. Screens include a pair of mobile feet, allowing them to be moved around freely, or set up in layouts to provide temporary privacy if required.

SKOOT screens are pinnable as standard, where upholstered panels are specified.
