Overview

BEC Systems is proud to introduce TRIO. Framed on 3 sides using lightly proportioned bespoke aluminium extrusions, TRIO's clean, crisp, angular design has been consciously conceived to reflect the latest trends in office furniture.

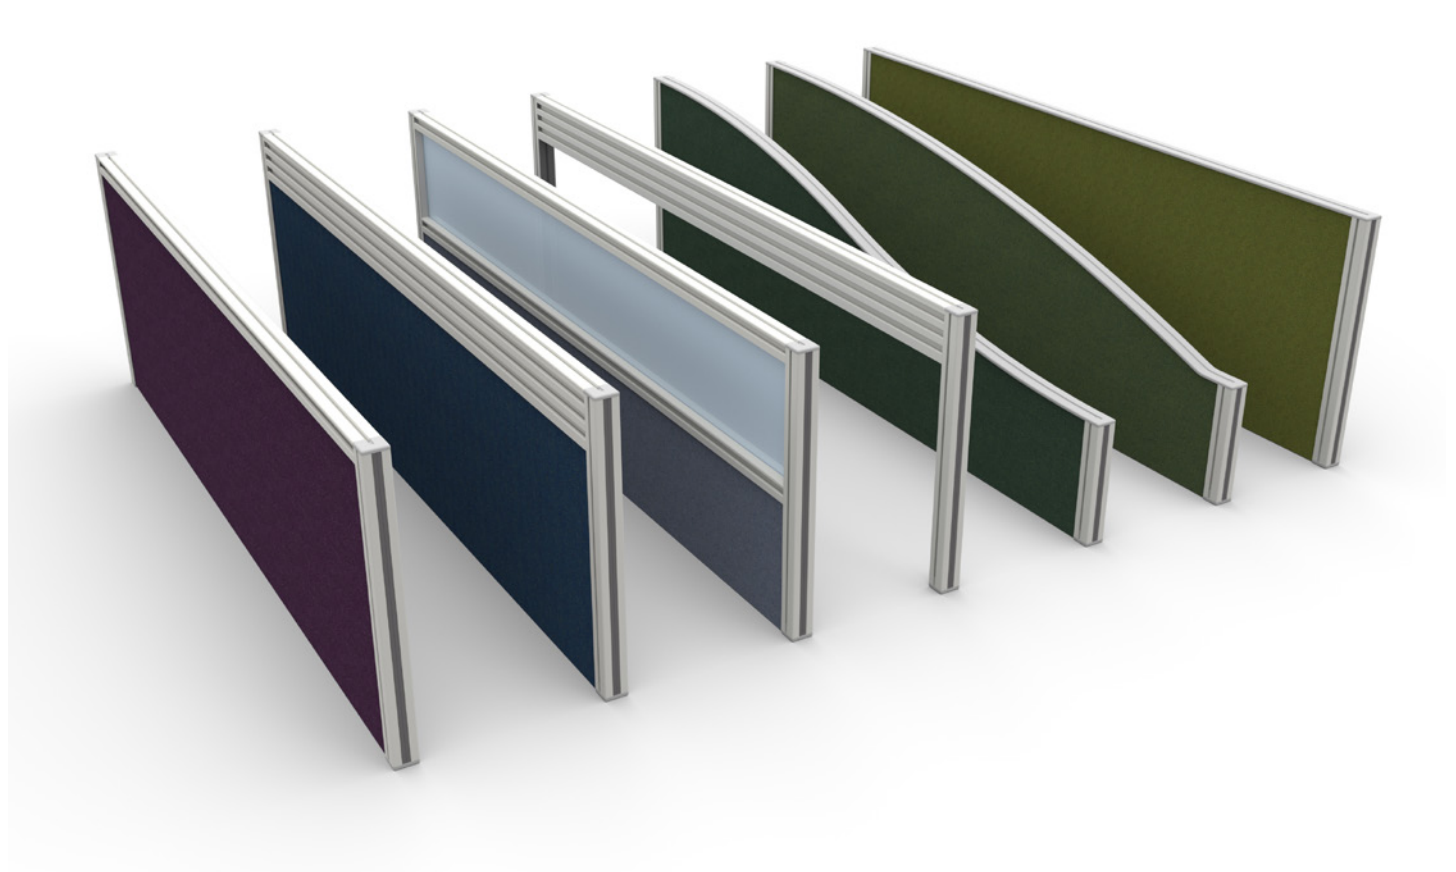

The use of intelligently designed aluminium extrusions and cleverly engineered bracketry, ensures that TRIO screens will integrate seamlessly with a wide range of desk types.

The TRIO product family includes plain fabric screens, triple toolbars, half glazed screens, and a management rail option designed to integrate with a wide range of popular screen hung accessories, thus further enhancing the screens functionality.

Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that TRIO screens can be confidently specified for use within the full hierarchy of office interiors.

T1 to T4 screens in the TRIO range are framed with robust aluminium extruded profiles on 3 sides, powder coated to match the desk frames and cleverly designed to include multiple features for mounting, linking and accessorizing. T1 and T3 screens have an integral hanging facility within the top rail, and the addition of the triple toolbar on T2 and T4, enables flat screen monitor arms to be mounted. Screens include a linking strip as standard, which doubles as an end of run trim, and a linking post is available to link up to 4 screens together at 90 degrees. T5, T6 & T7 screens have a PVC top rail.

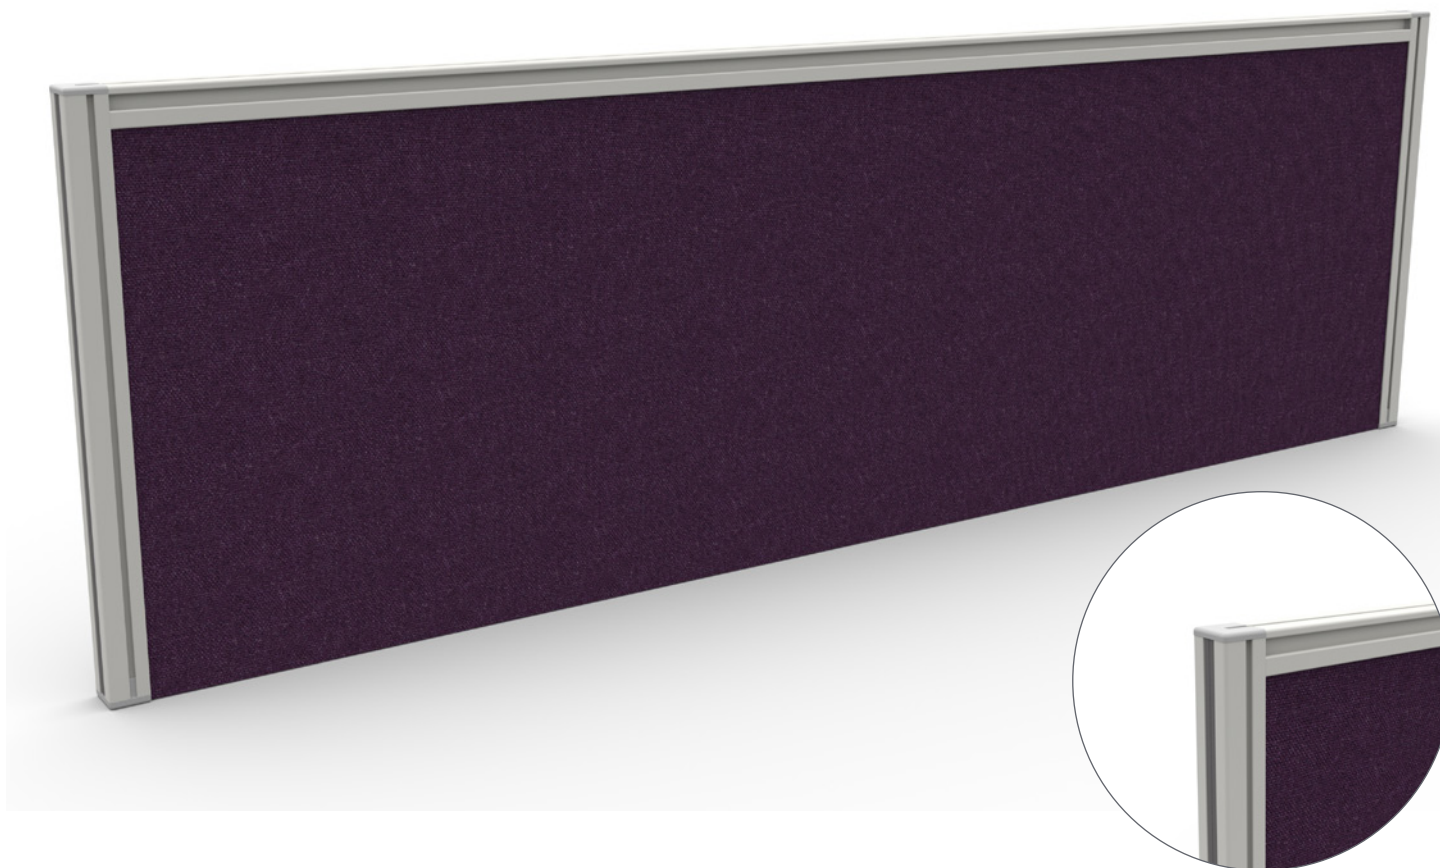

Screens are finished in fabric, and the glazed screens use 3mm clear perspex as standard, with coloured and frosted options available on request. Screens can also be made pinnable if required, and glazing replaced with perforated sheet steel or dry-wipe powder coated steel panels.

TRIO

- 30mm screen thickness
- Aluminium frame on 3 sides - T1, T2, T3 and T4
- Integral hanging facility - T1, T2, T3 and T4
- PVC top rail on T5, T6 and T7
- Toolbar and glazing options
- Huge range of colours available
- Crisp, clean design
- Competitively priced
- FIRA tested - The TRIO range of screens has successfully satisfied the relevant sections of BS EN 1023 and BS 476
