PRIVACY THROUGH OBSCURATION

Overview

Rack is proud to introduce **TWIN**. **TWIN** is a sophisticated range of clear, ultra-lightweight floor standing screens designed to provide 'privacy through obscurity' whilst maintaining maximum levels of light transmission and an 'open' feel to the workplace.

The clear fluted polycarbonate core is encapsulated with slimline aluminium profiles and colour coordinated die cast corners, giving the **TWIN** range a high-end premium quality feel. Available with a choice of static or mobile feet and a hinged link kit, **TWIN** screens are extremely easy to move and can be reconfigured in seconds to suit the users ever changing work needs.

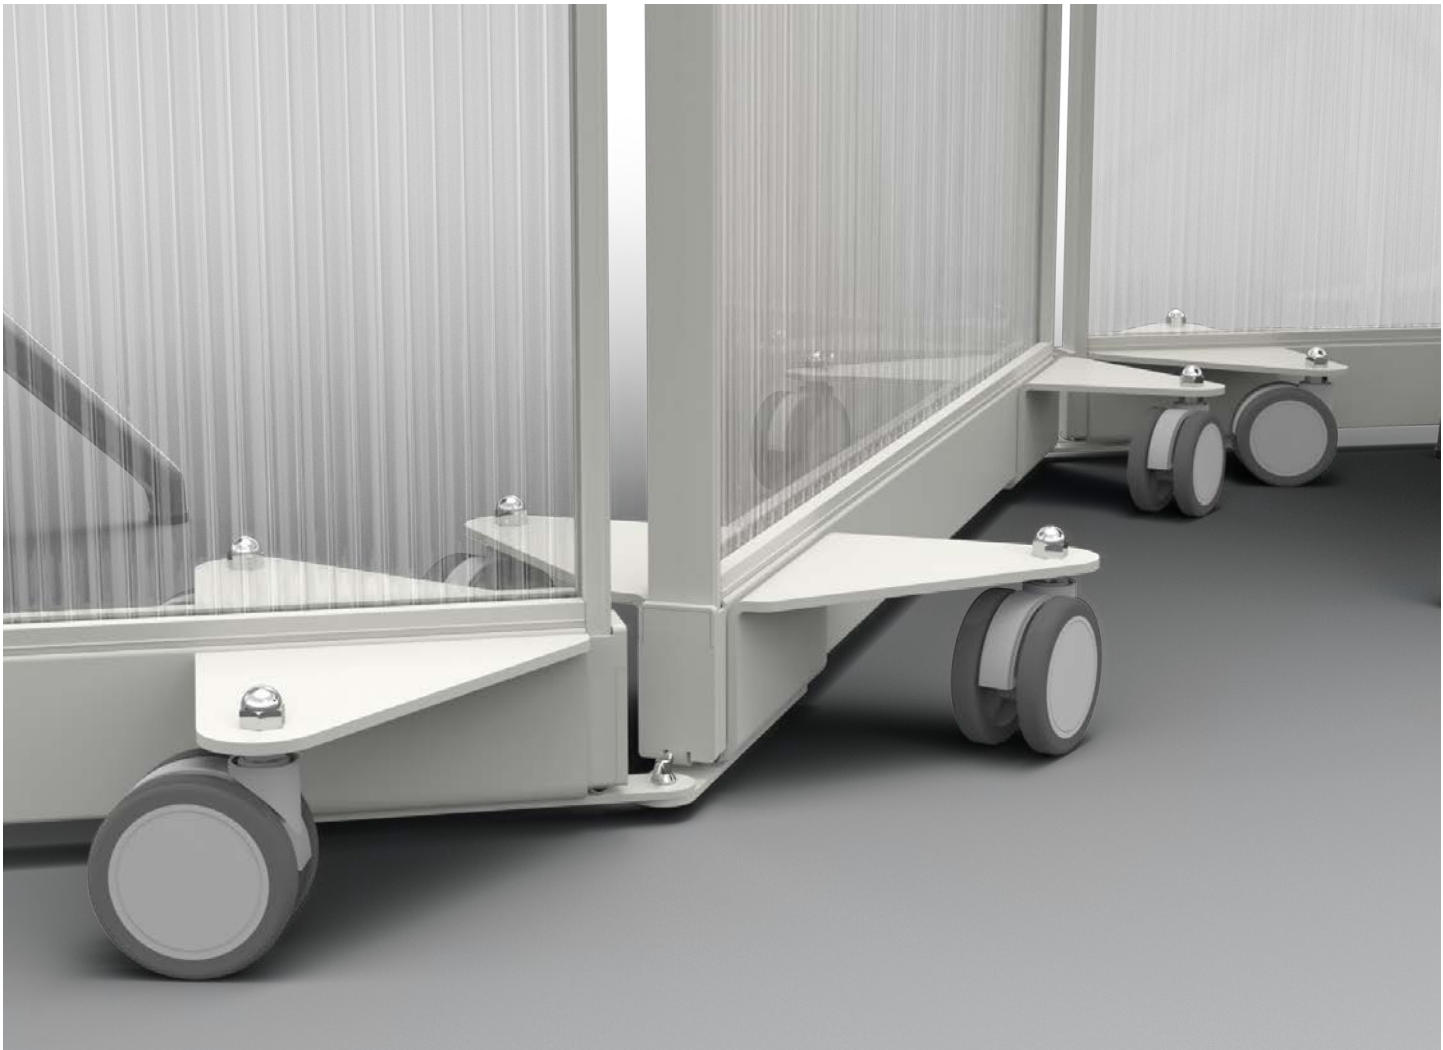

A combination of keen pricing, superior build quality and considered design ensures that **TWIN** screens represent excellent value for money, whilst remaining appropriate for use within the widest range of office interiors.

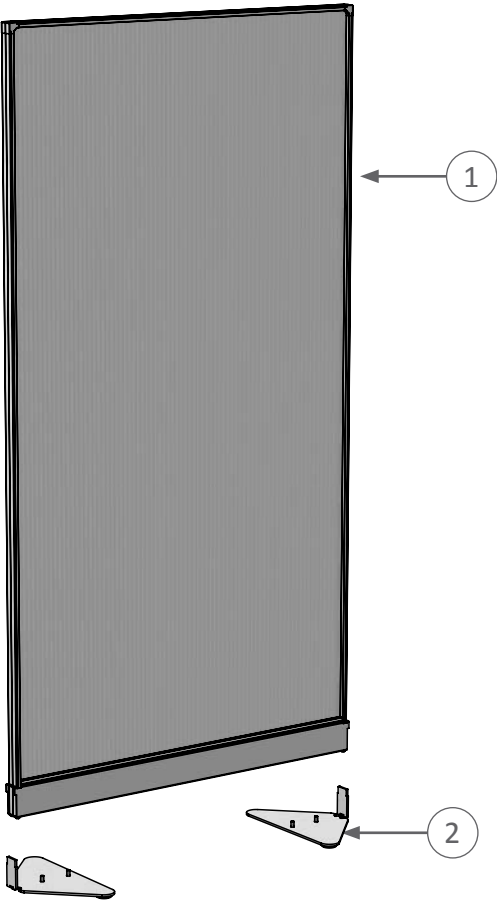

TWIN Features:

- Ultra lightweight construction
- Translucent fluted polycarbonate body
- Slimline aluminium trim
- Colour coordinated diecast corners
- Static or mobile foot options
- Static feet are on glides which makes them smooth to move
- Choose between two different heights
- Link mobile screens together with the link kit
- Contemporary understated design aesthetic
- Premium Quality
- Excellent value
- Designed and manufactured in Britain

PLEASE NOTE: Due to the light weight core material used and its inherent structural properties, the screen panel may have a slight tendency to bow or twist and as a result cannot be guaranteed to remain entirely flat.
